

I CANYUP I

— inspired by antelope canyon

- The inspiration of the lamp is from antelope canyon. As a slot canyon, it has many curvy organic walls. Walking in the slot, you can see beams of light come through the canyon and create a lot of amazing reflections. Photographers It is an incredible combination between light and nature.

Antelope canyon play with the sunlight and shadow from nature. As my inspiration, I create curvy and organic surfaces to play with artificial lights and paper layers.

try to figure out the right thickness to insert the paper

test how light works on paper
