# MENAGERIE

*Cafe and Learning Center*

DP01 FA2018

Zoos engage people in learning about animals and how we can co-exist.  
Modern zoos work hard to retain from the use of sedatives.  
Modern zoos introduce nature to many urban communities.

AR Unit 1: An interactive sandbox space where users can recreate topography of several locations with the aid of sand. Real-time augmentation then allows the sand to project information on wildlife in each set area.

AR Unit 2: An almost fully 360 degree immersive space, where activity of the users allows for the digital works to transform right in front of them and tell a story of our relationship with nature, and the importance of our boundaries within it.
