

翼

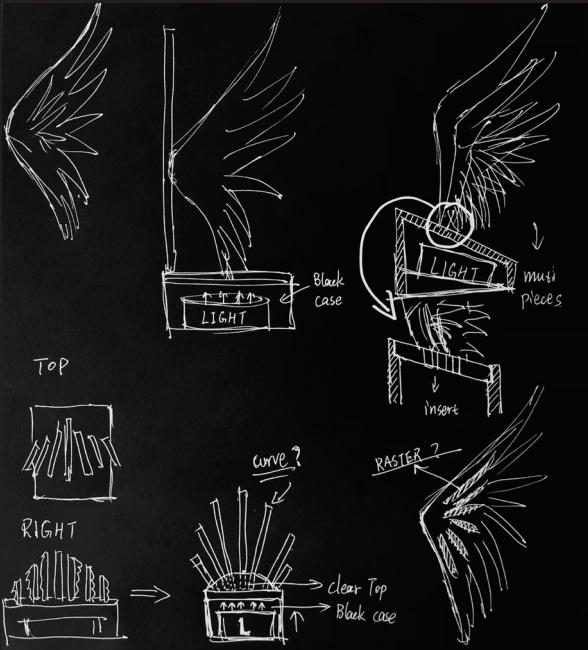

Wing

Since light can represent the hope and escaping the darkness, the concept of the lamp is to create freedom by rebuilding natural element which is The Wing. Wings give us an image of breaking restraint and flying away, so I bring the wing form into the lamp design — the base shape inspired by the cracked eggshell and wing pieces intersecting into the surface. The light will shoot the wing pieces through the cracked eggshell to project a free form.

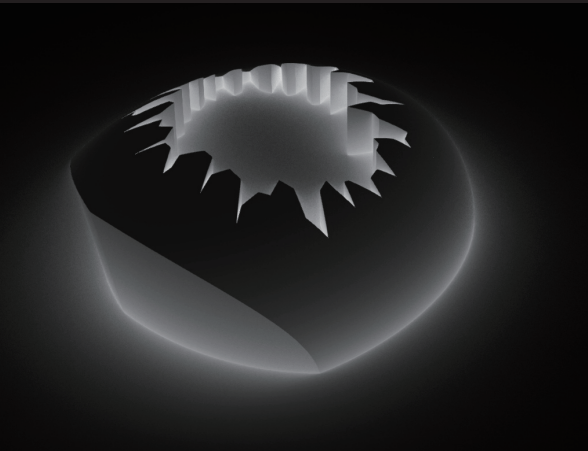

Inspired by the wing
