

Division

Taking a piece that area equals the front of the building and dividing equally. The purpose is to see how to play those pieces with dynamic shapes.

Twist

Twisting each piece by a dynamic way and connecting all surfaces to create the facade. Behind the facade, there will be glass wall.

Final

By placing the facade on the glass wall, people will see the different dynamic forms from different angles. Also, the the interior can be saw from the gaps of the pattern so that this facade may create mysterious moment for people who walkby.
